BlackBox GPS provides the most versatile asset monitoring solutions for businesses with vehicle fleets and important assets. Our asset monitoring solutions give you the ability to track and secure your assets 24/7 worldwide*. Our proprietary monitoring system empowers your organization with the tools necessary to increase control and accountability; thus, saving your managers time and money while increasing your bottom line. Our versatile tracking solutions seamlessly integrate to monitor and secure virtually any asset allowing you to be in the driver seat whenever, wherever.

BlackBox GPS empowers fleet managers and business owners with the capabilities to increase profits by cutting fuel costs, minimizing expenses, and improving productivity while monitoring and controlling your most valuable assets. This emerging technology has provided businesses a clear advantage over the competition to help control costs and increase productivity. The BlackBox GPS provides the ability to manage start/stop times, routes, speeds, mileage, and much more. By simply monitoring this comprehensive information it will allow you to better understand your fleet operations, improving your organization bottom line. Having the ability to monitor your assets help decrease vehicle maintenance costs from fuel consumption to accident liability, while also increasing productivity by monitoring faster delivery routes and improving customer care. BlackBox GPS is the ideal asset monitoring solution empowering managers with the tools to make better decisions to save time, trouble, and money.
